## ( Cost Function with Regularization)

W12+W22+b

"generalization"

W122+W22+W423+W42+b

"overfitting"

- Ws. W+= 0 on mic 42 电气 处理 overfitting 된 모델은 qualitatic function 모델처닝 电子 %
- > Ws. W4 or Penatty + 448 244 overfitting 1/21

Objective: make Wz, W4 really small (20)

min 1 m (f w,b (z(i))-g(i)) + 1000 W3 + 1000 W4 (W3 20, W420)

- tinear regression of squared error ast function alk!
- Wa, W4에 큰값 (eg.1000)은 급한34 Wa, W4의 값이 크9면 cost value 가 위계 역은 단하의 penatty는 전쟁되고
- Al cost function of 对是 独 如1月部胎 Ws. W4 在11 附 对的的 (20)
- Wa, W4 = 内午 华 张江 MINIMIZE 彭山州 千村里于里型(overfit) = 사용하다江至(三至左大地區)
  2차랑수 모델(generalized) 에 기의 곤경하는 한수 北台
- \* Prof fearte for 47 bish ord parameter (wi)= minimize #10+21 22 04?
- = " " feature on Those parameter = on penalty= +4"
  - = 95 feature = 1804 overfitting = "Regularization"

J(w,b) = 1 (fw,b(え(i)-y(i))2+2がよいか

(n = number of teatures m= number of training examples)

\* lambda ) = regularization parameter

= penalty for all parameters
